

THE DESIGN ENGINEER PRIESTHOOD

The concept is a new spiritual discipline that emphasizes an intimate understanding of the universe in which we all exist, from a Design Engineer's perspective.

A new movement and a mindset that allows us to better understand ourselves, on a COSMIC level.

The true purpose of intertwining Discovery Science, Industrial Design, Mechanical Engineering, and Spirituality.

The discipline of martial arts strengthens one's spiritual focus, perpetual flow state, and purity of intention.

To many with careers in those fields, Design and Engineering are a form of Spiritual Expression.

All Design Engineers should strive to become 'natural mystics' when developing design solutions with increasing orders of complexity, and dedicated research of applicable emerging technologies, reaching past the source of mind and matter-- into the pure creative process itself.

Design Engineers tap into the creative process at will and its infinite diversity of probable solutions, and thereby, in some minuscule way, mimic the higher processes of the universal creative process.

Religion vs Spirituality

Religion is believing in someone else's experience. Spirituality is having your own experience.

Creation in its purest form is a purposeful, problem-solving, universal design. Our individual creative processes-- our own purposeful designs-- are a time capsule of our present knowledge, interpretations, and beliefs.

Through the individual creative process, we can experience validation of our purposeful existence, an energy that has the potential to transport the soul to higher dimensions. And closer to the Creator Consciousness...

The Creator Consciousness exists as the environment of potential that allows each Galaxy to develop a unique set of genetic predispositions, so that diversity is amplified across the universe, which in turn enables the Creator Consciousness' potential to experience the broadest continuum of Life and Creation, in all of its dimensions.

Constant discovery, evidenced in the sheer intricacies of ever-evolving scientific revelations on the vast micro and macro-scope of the universe, and our eternal obsession to fully understand its Mysteries.

THIS MAY BE THE ONLY PURPOSE FOR ALL EXISTENCE

THREE SPIRITUAL PILLARS of
DESIGN ENGINEER PRIESTHOOD

FREQUENCY WAVE THEORY

Frequency Wave Theory (FWT) unifies Physics, Consciousness, and
Wisdom to decode the hidden structure of Reality

MEDITATION for PURITY of INTENTION

and

MARTIAL ARTS for DISCIPLINE

MASTER DESIGN ENGINEERS

Professional, MECHANICAL ENGINEERS, ELECTRICAL ENGINEERS, and INDUSTRIAL DESIGNERS are eligible to be designated as 'MASTER DESIGN ENGINEERS' and leaders within the Order. Graduation in all three fields of the specified educational training is required.

'MASTER DESIGN ENGINEERS' are recognized and awarded with a solid gold 'Zen Sage' statuette in an 'OffWorld Man Society' Ceremonial Event.

The 'OffWorld Man Society' was founded by Futurists, Industrial Designers, and Design Engineers, which are regarded as "Priests of Creation," to meet annually and brainstorm new ideas to build the future of humanity. "It is a mindset and a challenge; to think about and identify where our cumulative scientific research is headed and then forecast future products that benefit humanity.
