## ***POWERED***

The Koenigsegg R&D team explored the limits of electric propulsion and created the Dark Matter e-motor – an 800 hp, 1250 Nm patent-pending Raxial Flux e-motor. With the Dark Matter e-motor fitted, the Gemera drivetrain is now lighter, has a smaller footprint and is more engaging. Dark Matter is also the world's most powerful automotive-grade e-motor with 6-phase technology.
