

A SCIENTIST PROVED TIME IS FAKE AND REALITY BENDS TO THOUGHT. THE CIA CLASSIFIED IT FOR 26 YEARS. PAGE 25 REVEALED: "CONSCIOUSNESS CAN REWRITE THE PAST." THEN HE DIED IN FLIGHT 191.

In 1977, Itzhak Bentov—a biomedical engineer with NASA connections and multiple patents—sat down with the CIA.

His theory: The universe isn't "out there." It's a hologram inside you. Time is an illusion. Reality bends to focused thought.

The CIA took him seriously.

They created a classified 29-page report: "Analysis and Assessment of Gateway Process."

Conclusion: "Human consciousness can access any point in time. There is no past or future—only NOW."

Page 25 went missing for 26 years.

When declassified in 2003, it revealed:

"Time is a construct of the conscious mind"

"Consciousness can collapse quantum probabilities"

"Reality can be edited through focused intention"

Bentov's method:

Enter theta state → Synchronize brain hemispheres → Apply focused intention

Result? Reshape memory, influence probability, access information beyond space-time.

NASA used his techniques. The Pentagon reportedly feared it.

May 25, 1979:

Bentov boarded Flight 191 to present his research in Japan. The engine detached. 271 dead. His files lost.

One line survived: "We are energy experiencing frequency projected into form."

What's verified:

- ✓ Real inventor (NASA, patents)
- ✓ CIA document is declassified
- ✓ Page 25 missing for 26 years
- ✓ Died in Flight 191 (maintenance failure)

What's theoretical:

- ? Consciousness rewriting timelines
- ? Reality manipulation through thought

What's certain:

Meditation changes brain states. Memory is reconstructive. Quantum observation affects particles.

Whether breakthrough or theory... the CIA studying it tells you something.
