

CURVY MAKES A COMEBACK

Gaetano Pesce's homage to B&B Italia's 'Up' chair made a case for how curvy is back into our lives. From voluptuous seating (take Campana Brothers' 'Bulbo' armchair for Louis Vuitton) to curvy silhouettes on tables and lights (see Bohinc Studio's 'Planetaria' light), one of our favourite plus-size pieces was the customisable 'Daniels' seating system by Christophe Delcourt for Minotti that can be remodelled into any configuration you so desire.

CRAFTS TAKE CENTRESTAGE

Spanish luxury brand Loewe invited 11 artisans from Kentucky to Cape Town, to showcase a limited-edition objet d'art made using the brand's signature leather while showcasing different basketry techniques. At the Missioni showroom in Brera, visitors could enter a technicoloured space of what looked like a crocheted doll house. In lights, New York's Apparatus Studio presented a selection of hand-embroidered scones and pendant lights, and in furniture too, weaves were everywhere, with rattan chairs, tables and beds becoming the new design darling
