CONTRACT ASSEMBLY

Saving time and money with one-stop logistical support

Sometimes you need more than just production—you need logistical support, like contract assembly, warehousing, and just-in-time delivery. What you don't need is the hassle of dealing with multiple vendors and the worry that you're paying too much. As part of our one-stop quoting process, we can easily include cost-effective logistical support services like assembling your parts to meet your specifications, storing them in our warehouse until you're ready for them, and delivering them on time wherever and whenever you need them.

Customer service you can count on

Whether you're requesting a quote, checking your order status, or asking a question, your phone call will always be answered by our friendly, knowledgeable customer service staff—and not by an answering machine.

HOME > CAPABILITIES

ISO 9001-certified quality and cost-efficient production methods

CAPABILITIES

Delivering one-stop, hassle-free production from start to finish

When your parts require more than just machining, why waste time dealing with multiple quotes from multiple vendors? With only one call and one quote, we can quickly and cost-effectively produce your parts from start to finish. You'll save time, eliminate hassle, improve quality, and know you're getting the best possible price.

Our capabilities include:

- Heat treating
- Anodizing
- Plating
- Grinding
- Finishing
- Packaging
- Contract assembly
- Warehousing
- Just-in-time delivery

How it works: our one-step process in action

When you call, our knowledgeable and experienced customer service team will walk you through the quoting process. Whether it's simple machining or full-scale finishing, assembly, and logistics, we'll help you figure out what services you need—and we won't try to sell you those you don't.

Quoting Machining Finishing Assembly Logistic

- One Call, One Quote
- CNC Milling
- CNC Turning
- Screw Machining
- Heat Treating
- Plating
- Anodizing
- Grinding
- From basic sub-assemblies to complex units
- Packaging
- Warehousing
- Just-in-time Delivery

Satisfying our customers with high-quality parts produced exactly to print

COMPANY

Delivering parts on time and to print for over 20 years

At M&M Automatic Products, we focus on what we do best: short runs and small lot sizes of precision-machined parts delivered on time, to print, and within budget. From our skilled and experienced machinists to our friendly and knowledgeable customer service team, our employees work hard to meet your needs and exceed your expectations on each and every job. Let us show you!

A family-owned and family-operated company

We're proud to be part of the Miller family of companies, family-owned and -operated businesses that have been satisfying customers since 1945. Coming to the United States with only his work ethic and a dream, Francis Paul Miller built a legacy that his grandchildren proudly maintain today: a family of companies that includes M&M Automatic Products, F.P. Miller Company, Miller Truck & Storage Company, Air-Hydraulics, Inc., and Phyleo Realty Co.

Why you can count on M&M Automatic Products

The F.P. Miller legacy is more than just a story to us: it's a constant reminder that satisfying our customers and earning their long-term business is the goal of every M&M employee. That's why we maintain ISO 9001:2008 certification, rigorously monitor quality, carefully train our machinists, personally answer our phones, and consistently deliver our customers' parts exactly to print, exactly when promised.

Our goal: Satisfy our customers and earn their long-term business

Quality assurance and customer service you can trust

As one of our employees said recently, "We really care about each and every customer." That means all of our quality assurance procedures—from our ISO 9001:2008 certification to our machinist training programs—are designed to ensure that your parts are produced exactly to print every time. It also means that when you need to talk to us, we'll be there. Our phones are answered by real people (not machines!) who you can count on to get you the answers you need when you need them.

Rigorous quality

QUALITY ASSURANCE

Quality You Can Count On

Our rigorous quality assurance procedures have been carefully designed to ensure your parts are produced exactly to print every time. Plus, our skilled and experienced machinists (some with more than 30 years in the business) are committed to making sure we earn—and keep—your long-term business.

We maintain our high level of quality through:

- ISO 9001:2008 certification
- Calibrated gauges traceable to National Institute of Standards and Technology (NIST) standards
- Custom gauges built per job requirements
- Surface finish analyzers
- Optical comparators
- Digital height gauges

ISO 9001:2008 Certification

The quality of your parts is simply too important to risk by working with an uncertified vendor. Avoid the risk—and the cost and time spent dealing with nonconforming parts and re-operations and processes—by working with us. Because we're ISO certified, you can be confident that your parts will be produced with the quality you need and expect.

Strengthening our business through trusted affiliates

AFFILIATIONS

Jackson Area Manufacturers Association (JAMA)

The Jackson Area Manufacturers Association (JAMA) is a not-for-profit association of manufacturers and associate partner members in and around Jackson County, Michigan. JAMA is focused on helping to improve the manufacturing climate of south-central Michigan by providing technology information and training, offering assistance with local, state and federal government programs, and providing workforce and economic development support services.

Airo Steel

Airo Steel supplies a full line of metal, industrial supplies, and plastics and offers a complete range of processing services, including CNC flame, plasma, and laser cutting; Blanchard grinding; thermal processing; and waterjet processing. Airo Steel is headquartered in Jackson, Michigan, and maintains locations in 11 other states.

Central Steel & Wire Company

Central Steel & Wire Company is a distributor of ferrous and nonferrous metal products and offers a full range of processing services, including annealing, blanking, CNC laser cutting, galvanizing, and structural fabrication. Central Steel & Wire is based in Chicago and maintains office and plants in Chicago, Cincinnati, Detroit, Greenston, and Milwaukee.

NSF International

NSF International is an independent, not-for-profit organization that provides standards development, product certification, auditing, education, and risk management for public health and the environment. Manufacturers, regulators, and consumers look to NSF International for the development of public health standards and certifications that help protect the world's food, water, health, and consumer products.

What is Air-Hydraulics?
 Air-Hydraulic Presses are an exclusively designed hydro-pneumatic press with a full length hydraulic intensified power stroke using factory supplied air.

The cost effective and energy efficient alternative to hydraulic presses

C-Series Air-Hydraulic Presses:
 Available in four sizes ranging from 2.5 ton to 15 ton capacity. Standard features include a full length power stroke, 2.0" positive downstop adjustment, and an anti-rotation ram guide. These heavy duty C-frame units are also available with matching floor stands, a variety of controls packages, or custom designed to meet your application requirements.

DESIGNED FOR:

- Riveting
- Crimping
- Punching
- Swaging
- Trimming
- Marking or Character Stamping
- Assembly
- Notching
- Joining
- Forming
- Fastening

C-Series Air over Oil Press
with Force Monitor and Fault Circuit Indicator

Affordable Press Monitoring for Quality Control

An economical solution for quality assurance without the major investment. This package gives a simple, yet effective solution to quality control by offering both press force monitoring and a mistake-proof press cycle mode, which allows a more lean manufacturing process by eliminating non-conforming assemblies.

C-Series Air-Hydraulic Press with Press Force Monitoring and Press Fault Circuit

- Integrated Press Force Monitor with Rod End Load Cell
- Delivers Real-Time Pass/Fail Feedback
- Easily Adjustable High/Low Set Points
- "Poka-Yoke" Fault Circuit Design to Verify Completion of Press Cycle
- Three Selectable Modes of Operation:
 - Press Force Monitoring
 - Fault Monitoring
 - No Monitoring

Download our C-Series Press printable pdf for specifications.

Poka-yoke (ポカヨケ) [poka yoke] is a Japanese term that means "mistake-proofing". A poka-yoke is any mechanism in a lean manufacturing process that helps an equipment operator avoid (yokeru) mistakes (poka).

* Source: www.wikipedia.org

Read online the C-Series Air Over Oil Press with Press Force Monitoring case study and hear how Air-Hydraulics satisfied another customer by thinking outside of the box.

TQM 700 Press Force Monitoring

The TQM is excellent for press force assembly, insertion, staking, and verification. Not only will it monitor force, but it will assist in protecting your investments by reducing downtime, improving productivity and improving product quality

EMAIL US! We'll send the specifications on the TQM 700 Press Force Monitor.

Press Fault Circuit Indicator

Ability to verify a complete press stroke utilizing the (E-FI) fault indicator control circuit. This circuit indicates a "short stroke" of the press cycle. Fault needs to be acknowledge by the operator prior to the next press cycle.

Signature Analysis Press

Our line of Sig-Series Presses offers a fully integrated assembly process monitoring package (force over distance), which gives you complete quality control & verification of your assembly process.
