

Building Plan Review

TRB + Associates, Inc. team is well versed in the administration and practical application of California's model building codes in plan review. The team includes experienced ICC certified plans examiners, licensed engineers in multiple disciplines, and certified code officials. We are sensitive to the time-critical nature of plan review and offer timely turnaround on plan review projects. TRB+ can also accommodate expedited reviews on an as-needed basis.

TRB+ provides comprehensive building safety plan review services for commercial, residential, and industrial facilities for conformance to model code standards and locally-adopted ordinances. Our plan reviews are tailored to align with your agency's standards, interpretations, local ordinances, and processing and delivery method preferences.
