# The top patent law education. Anywhere you need it, any time you need it.

Don't let a hectic life get in the way of your success. Patent Resources Group's Video on Demand (VoD) courses let you progress in your career while saving you time and money. We understand you're busy. Meetings, clients, family, and other obligations can dictate the time you have to dedicate to taking much-needed courses. That's why our VoD courses give you the tools to succeed without halting your life.

## We have experience like no one else. And technology like nowhere else.

PRG has been a trusted leader in patent education for 40 years. Each state-of-the-art VoD course is taught by the same faculty as our in-person lectures, so you're getting the best patent education from the most trusted names in the business. If you can get on the Internet, you can benefit from decades of experience whenever you want.

Along with videos of our trusted faculty instructing each course, you'll have a PowerPoint presentation that follows along with the video. As the video moves forward, so does the presentation, keeping you focused and on task. Plus, when you purchase a VoD course for CLE credit, you'll receive a **FREE** supplemental textbook.

brochure code: V9B1

## The entire course is under your control.

PRG's Video on Demand courses give you the power to rewind, repeat, and reinforce. If there's something you feel like you missed, or want to hear again, simply rewind the video and watch it again. The PowerPoint presentation automatically backtracks to the corresponding point in the video, so you don't have to waste time matching the notes to the lecture.

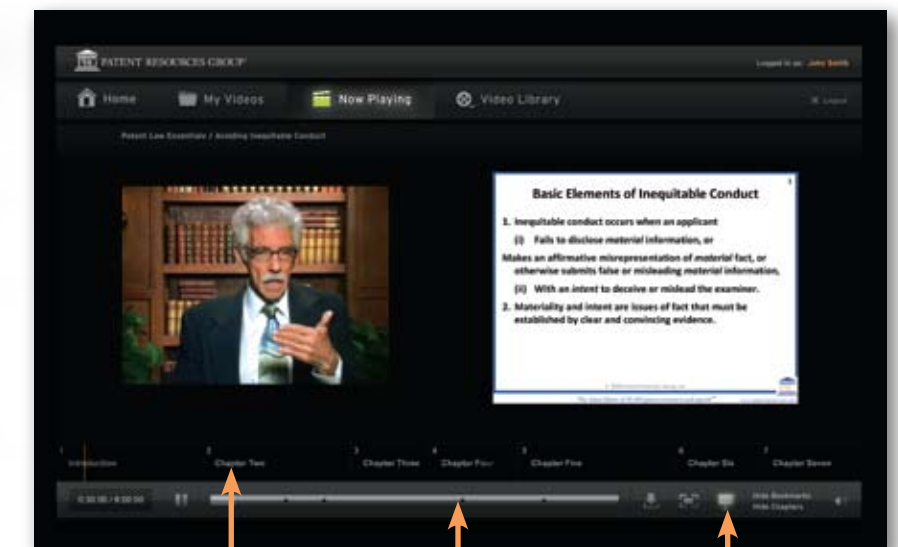

## Take the courses you need at the pace you want.

- Choose which courses you want.
- Do what you can when time allows.
- Pick up where you left off.
- Go back and watch a part again.
- Reinforce the material with the in-sync PowerPoint presentation.
