Welcome to the Inaugural LL&M Winter Symposium

We are excited to introduce the first-ever meeting of the flagship Lymphoma, Leukemia & Myeloma Congress's **LL&M Winter Symposium**.

Building on 25 years of excellence as the premier hematology conference, this event exemplifies our dedication to advancing education in hematologic malignancies. On February 7-9, 2025, at the Fontainebleau Miami Beach hotel, healthcare professionals who are focused on improving patient outcomes for individuals with blood cancers will hear the **latest clinical data updates** from recent hematology/oncology conferences across the globe.

As the first major hematology meeting of 2025, this landmark gathering will foster a vibrant exchange of ideas and practical insights into how evolving scientific evidence will impact clinical practice.

Attendees will leave with a comprehensive understanding of the latest advances in hematologic malignancies, knowledge of how to integrate these innovations into their clinical practice, and the ultimate goal of enhancing patient care and outcomes. Don't miss this opportunity to be part of a historic moment in the evolution of hematologic malignancies education.

Meet us in Miami Beach.
