

MANAGE THE MOBILE MADNESS

MOBILITY WILL BE ONE OF THE HIGHEST PRIORITIES FOR CIOs IN 2015.¹

EMM and YOU and CDW

One solution to manage all mobility issues. One point of contact.

See why CDW has the expertise to design and deliver the best enterprise mobility management (EMM) solution for how your business handles the mobile device hoopla.

BY 2017, IT'S PREDICTED THAT HALF OF ALL EMPLOYERS WILL REQUIRE EMPLOYEES TO SUPPLY THEIR OWN DEVICE FOR WORK PURPOSES.²

The IT Leader

Managing her organization's mobile issues has never been easier with one all-encompassing EMM solution from CDW.

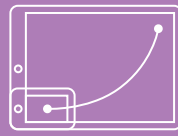

MDM (MOBILE DEVICE MANAGEMENT) The Device Junky

He just feels more comfortable with multiple devices on him at all times. And that's OK now, thanks to EMM from CDW, which includes built-in MDM, giving his IT leader complete visibility and control.

MDM provides a single interface to manage users' device connections, secure their contents, and allow access to company resources at an aggregate, departmental, user group or device level.

THE NUMBER OF DEVICES WILL MORE THAN DOUBLE FROM ITS CURRENT LEVEL TO 40.9 BILLION IN 2020.³

WHY CDW?

360-DEGREE MOBILITY APPROACH

Established mobility, wireless and security teams meet often to strategize based on current marketplace trends, influences and challenges.

THE RIGHT RESOURCES

Solution architects, engineers and partners bring best practices and hands-on experience, making CDW a master of the craft.

CISCO ADVANCED TECHNOLOGY PROVIDER (ATP) PROGRAM

One of the first members of Cisco's ATP program, CDW has installed and integrated hundreds of Cisco Identity Services Engine (ISE) solutions.

ONE POINT OF CONTACT

CDW is your single point of contact for all EMM needs — no matter how many vendors it takes to create the right solution for your business.

MOBILEIRON VAR PARTNER OF THE YEAR

MobileIron recognized CDW for top performance in helping customers secure and manage mobile environments while increasing employee productivity.

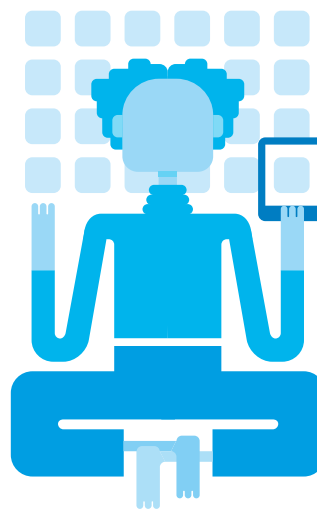

MAM (MOBILE APPLICATION MANAGEMENT) The App Guru

She has all approved enterprise apps, like email and calendar, constantly running on her device, but she doesn't care — they help her stay productive. Her IT leader doesn't mind either, since the apps were simple to deploy, secure and manage with MAM from CDW's EMM suite.

MAM secures enterprise apps by encrypting transmissions with application wrapping, enforces app updates and controls role-based access, which reports on usage to help with license tracking — saving your business money.

90 PERCENT OF ALL ENTERPRISES USE SOME SORT OF THIRD-PARTY APP AS PART OF THEIR MOBILE STRATEGY.⁴

9 OUT OF 10 PEOPLE USE SMARTPHONES FOR WORK WHILE THEY ARE ON PERSONAL TIME.⁴

MCM (MOBILE CONTENT MANAGEMENT) The Content Hoarder

His device can hold 128 gigabytes — and with the number of apps, plus the amount of content that he saves and shares, it's still not enough. He just has a lot of ... stuff, OK? It's fine though, now that his IT leader deployed EMM from CDW, which includes an MCM solution for user authentication and content encryption.

MCM empowers IT staff through containerization, secure file sharing and collaboration, role-based user access control, and data loss prevention via printing limitations, geofencing and third-party app access restrictions.

Better Together: NAC and EMM

The IT leader likes to be in the know, especially when it comes to all these devices and apps that are clamoring for network access. CDW helped her take it one step further — by integrating network access control (NAC) and EMM solutions.

NAC and EMM provide the utmost control and visibility into the configuration of mobile devices that are ever present in today's burgeoning mobile landscape.

4.9 BILLION CONNECTED THINGS WILL BE IN USE IN 2015. AND, BY 2020, IT WILL BE 25 BILLION.⁵

MobileIron

and

and

MobileIron's innovative EMM offering is available both on premises and via a Software as a Service (SaaS) model — plus it's an EMM vendor that demonstrates real-time, remote-view capabilities on iOS.

Cisco offers ISE, enabling it to support authentication in heterogeneous network infrastructure environments.

CDW's partnerships with MobileIron and Cisco are unrivaled in the marketplace.
