

Mentor questions My Mentor: Robert Trevino (a NASA employee)

1

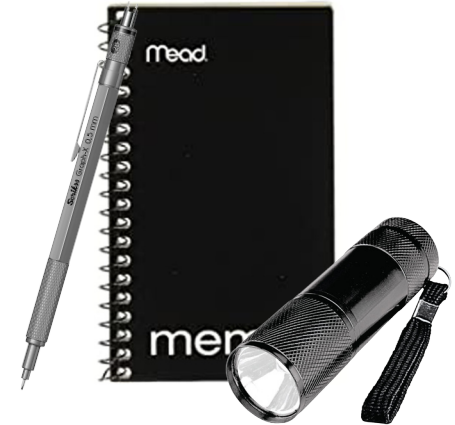

The duration of Astronauts's time aboard the ISS is usually around 6 months. They work 6-8 hours a day, 6 days a week. There is no washing of clothes on the ISS, but this garment will be taken off when they are exercising.

2

Average temperature onboard the ISS is 72 degrees. When the electronics are turned on the temperature can escalate slightly.

3

Astronauts will need to carry a pen or mechanical pencil, a small flashlight, and a small log book on them when working on the ISS.
