

# CONCEPT

*Due to the climate in Singapore, Singaporeans tend to not enjoy the outdoors just by sitting down and enjoying a drink. Hopefully with this proposal and shade provided, locals and tourists alike can and will enjoy the outdoors in Singapore. What better way for Singaporeans to enjoy the outdoors? It is through food. With shade provided, creating the space for food trucks to come in. People coming in to the space buying food, queuing for it and enjoying food outdoors. Having a food fair. Clouds are shades in the sky. It shifts and is somewhat like an interactive shade. It is an idea I wanted for the design of the shade. It creates an installation on a street level.*
