

CHAMBERLAIN Garage PowerStation

Air, Power and Lighting - Within Reach

consumer insights

I hate having to drag out my compressor everytime I need to fill up my bike tires!

I never have enough light when I am trying to do things in my garage.

Everytime I have to use my power tools, I end up with tangled cords and no available outlets!

10 amp outlet and pressure gauge on back of the task light

25 Foot retractable extension cord and air hose

LED Worklight with hook and 100PSI inflator

Easy 2 lag screw installation and plugs into the spare outlet next garage opener

Overhead task lighting automatically turns on when task light is pulled
