

# The HOUND® MARIJUANA BREATHALYZER

An ultra-sensitive solution that tests for recent cannabis use on-location, providing accurate, objective results within minutes.

It is the only test to differentiate between an individual who used THC (the psychoactive part of marijuana) within the last few hours. aINSIGHT's clients will be among the first organizations in the world with the opportunity to deploy cannabis breath testing as part of our workplace safety initiatives. aINSIGHT's core focus is pre-and post-hire compliance process management.

- Self-administered collection
- On-site testing and results
- Training in minutes
- Identifies only recent cannabis use

- Mitigates risk while retaining valuable employees
- Deters irresponsible use of cannabis during work hours
- Allows employers to make decisions based on recent use
- Helps to avoid the unnecessary rehiring costs associated with the loss of responsible employees who test positive long after impairment subsides

## About aINSIGHT

aINSIGHT's core focus is Pre- & Post-Hire Compliance Process Management. Our strategic focus is to develop comprehensive services for all industries. Our solutions are designed to automate administrative burdens, integrate across multiple systems, and minimize risk. aINSIGHT strives to provide our partners with the most functionality in the industry from a single platform.

Define, automate, and manage any aspect of your programs the way you see fit. Plug and play any of our pre-defined configurations, connect services with any of our existing network partners, or take advantage of our in-house agile development team to deploy custom features and connections specific to your needs.

Our mission is to transform the screening industry through the thoughtful design, implementation, and management of intelligent, sophisticated software solutions that consider all aspects of our customer's challenges throughout the employee life cycle.
