

THANK YOU

It was fun to work on product in this capacity again!

I applied texture to showcase my understanding of fabrics and to give further meaning to the trend research I did around the direction given.

When it came to the women's re-defined classics, I did not find a color palette/trend page in the pdf. I just used the palette for mens. I hope this is acceptable....if not, I will revise with new colors.

I modified some of the soles of the shoes to make them follow along the lines of modern shoes I saw. I know that in a work environment, I will follow, unmodified, the shoe given from design.

Again, thank you so much for the opportunity to be considered for the colorist position at Merrell.

-Brooke

always new adventures
