

# IOLITE SERIES

## 1", 2", 4" Small Aperture LED Downlights

Iolite Series offers a total design solution that can match every vision with its architectural-quality, round and square die-cast aluminum reflectors

at a great price point. The recently expanded line now includes Adjustable Slot, Pinhole, Bull Nose Regress and Trimless. And yet, Iolite's real strength is its function and versatility. The modular system allows users to change the beam spread from spot to narrow flood or flood without the use of tools, so that each module can be individually adjusted for its own intended purpose. The luminaires produce 600 to 1000 lumens at 95 CRI in various kelvin temperatures or Comfort Dim (3100K-2000K) technology.

NI0B-1RPH  
1" Pinhole

NI0B-2RSL  
2" Adjustable Slot

NI0-4RNB  
4" Bull Nose Regress
