Your Single Source for Commercial Lighting

QUALITY, RELIABILITY AND CONSISTENT PERFORMANCE

Nora/NSpec Lighting can be your single source for lighting commercial spaces. Provide general broad illumination with LED Edge-Lit Panels or Center Basket Troffers. Illuminate high ceiling areas and corridors with 4", 6" and 8" Sapphire downlights up to 8000 lumens. Highlight pictures, focal points, or general illumination at standard ceiling heights with the 1", 2" or 4" Iolite Series. For complete flexibility, combine track lighting with recessed multi-light systems in 1-, 2- or 3-light configurations. Identify spaces or solve difficult lighting tasks with 2", 3" or 5" iLENE LED pendants or high lumen general lighting with our 6" cylinder line. Don't forget, we can complete your project with LED Exit and Emergency lighting. One company, one source, consistent performance and reliability. Nora/NSpec Lighting...Large enough to do it right, small enough to care.
